

Amenity Forum Updating Events 2016

Policy issues and legislation

Grant Stark

The story so far

- Into the second decade.
- Addressing Government and industry lack of knowledge by working together.
- Still lots to do, support the Amenity Forum.

The controls – risks and benefits

Pre- authorisation checks

EU Regulation.

Member States, EFSA, Commission identify and manage risks.

Delivered by regulatory means.

Glyphosate being dealt with here.

Product Use

EU Directive

Member States, decide how to ensure proper use.

Mix of regulation and industry-led approaches.

Focus of our work here today.

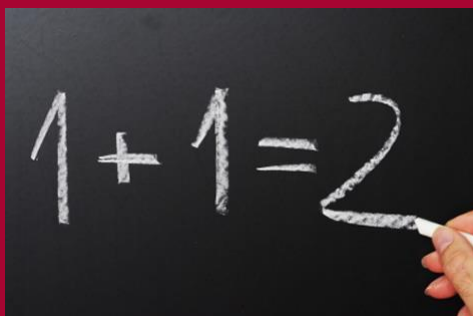

Post-Use Monitoring

Range of EU legislation

Member States arrange (e.g. foodstuffs, waterbodies)

Determines whether authorisation processes working/ use is correct.

The PPP(SU) Regs – easy stuff

Training

- New requirements on specified certificates. But recommend CPD.

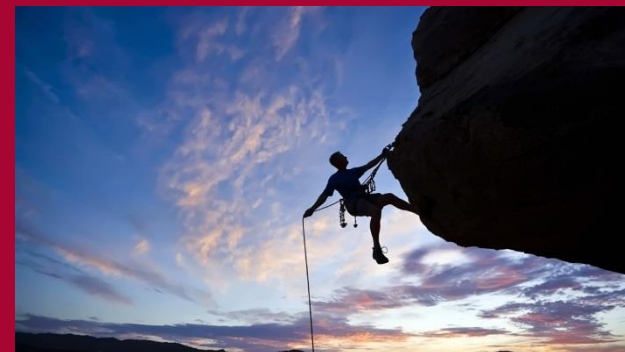

Sales of product

- Make sure end user holds a certificate. Distributors with certificates too.

Application equipment

- Get it tested, regularly calibrate.

The harder stuff

Reasonable Precautions

- If using, causing or permitting use, and/or handling and storage. Demonstrate due diligence. Use available guidance.

Protecting water

- Significant , high-profile issue and tough standards. Awareness of risk important.

Integrated Pest Management

- Policy priority, use four key principles.

Thank you
